

How would you describe the layout?

1. Do you like placement of the all the objects on the screen? Where would you rather them be or not?

I do like the placement, I like that the stocks are above news as that is the most important part of this website.

2. How cluttered is the interface?

The interface is not too cluttered, because on full screen mode the placing is well spaced while on the half-window view it auto scales and places one "block" of information after the other.

3. Do the color schemes standout or are they distraction...?

More color would be nice, because it is very bland currently. Maybe have a background color that is warm, but don't put color on the individual news/finance/social media feeds because I think that that would be too distracting

4. How do you feel about the layout for each section?

As Donald trump would say, "it's bigly fantastic"

5. Is the location of the options in a good place? (add drop downs either under the search bar or somewhere near the individual sections)

They are located in a good spot, maybe make them a bit bigger

Functionality – click and search

1. Does the search specific enough information

For the most part, I was expecting more finance related search results

Finance section

1. Is the current information shown useful?

IT's a picture so for an artist yes, if the information displayed was real then yes. It would be nice to see a slider for years on the graph, like stock price over five years.

2. What other information would you like to see?

Commodities, the prices of gold, oil, wood, etc. Different investors pages as well.

3. Is the information well ordered, clear, and does it look pretty?

Yes

News section

1. Are the news articles helpful to your company search?

More finance related searches, but overall yes

2. What other news outlets would you want to see if any?

Google finance section.

3. How would you want links to news articles to be displayed?

They are fine the way they are

Tweet section

1. From where do you want to see the tweets (by company twitter handle, hashtag...?)

Official twitter page would be the best

2. How many tweets of the type mentioned above do you want to see?

7

3. Do you want more functionality with the tweet (link to go to the tweet)?

yes
